

This is my new form with the dropdown for the seminars and the Button to open up the report:

Listen Seminarbesucher

Seminauswahl:

cmdOpenReport

This is my query for the cbo (Seminauswahl):

T_Seminar			
*			
🔑 Seminar_ID			
S_Name			
S_Datum			
S_Dauer			
S_Referent			
S_Uebersetzung			

Feld:	Seminar_ID	Seminarname: [S_Name] & " " & [S_Datum]	S_Datum
Abtabelle:	T_Seminar		T_Seminar
Sortierung:			Absteigend
Eigenes Feld:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Primärfeld:			
Indizes:			

This is my VBA-Code for the cmdOpenReport (name of cbo is: **cmdOR**) field:

```
Private Sub cmdOR_Click()
On Error GoTo Err_cmdOR_Click

If IsNull(Me![cboSeminare]) Then
    Me![cboSeminare].SetFocus
    Exit Sub
End If

With DoCmd
    .OpenReport "Seminarbesucher alle", acViewPreview, , "[Seminar_ID]=" & Me![cboSeminare], acWindowNormal
    .RunCommand acCmdZoom100
End With

Exit_cmdOR_Click:
Exit Sub

Err_cmdOR_Click:
If Err.Number <> 2501 Then
    MsgBox Err.Description, vbExclamation, "Error in cmdOR_Click()"
End If
Resume Exit_cmdOR_Click
End Sub
```
